Location: Missoula, Montana.

Title and Reason: Proposed car bodies for storing small track material.

There is considerable loss by deterioration and rust to track belts and other small track fastenings at Missoula because we have not adequate facilities at the material yard to store this material and protect it from the weather. For this reason it is desired that two car bodies be placed as shown in the attached plan, such car bodies to be used exclusively for the storage of small track material that must be protected from the elements to prevent rusting etc.
