In case of stoppage on main track flagman must go back immediately with stop signals a sufficient distance to insure full protection to his train. Conductors and switch foremen will be held responsible for the strict observance of this rule.

To insure personal safety, operators having train orders or messages to deliver to passing trains will stand to the right hand side of the train and avoid standing between tracks when possible to do so.

ALL trains must move within yard limits prepared to stop unless the main track is seen or known to be clear.

All train crews, switch crews and light engines using D. T. main line from connection of Missabe coal dock with this track to east end of Zenith Furnace Company's lead, on Grassy Point line, will move in both directions under full control expecting to find the D. T. main line occupied.

D.T. connection, located at east end of Zenith Furnace Company's lead, Grassy Point line, will be considered a railroad crossing. Traffic using this connection will make usual stop and make sure that track is clear before proceeding.

The D.T. main line is the northmost track between the Boston Coal Dock crossing and connection with Grassy Point main line.

All switches leading from this track, when not in use, will be left lined for same.
